

How To Use Virtual Desktop Across Multiple Monitors

1. Once logged into your virtual desktop, click on the black bar at the top to show the menu.

2. Click on **Window** to exit out of Full Screen.
3. Move the windowed VOA so that the window is on all screens. This may require you stretch the window. It does not have to fill the screen.
4. Now click on **Full Screen** at the top of the virtual desktop session

5. The virtual desktop session will now cover all the screens, but it treats it as one big screen.
6. Log off and log back in for the virtual desktop to recognize the individual monitors as it should.
